TERIX OPENS APAC HQ

Sunnyvale, CA July 29, 2005 —Terix Computer Service announced the opening of its Asia Pacific headquarters in Sydney, Australia today. Terix is offering an expanded line of IT support services for servers, storage, and UNIX Operating Systems. “Our strategic customers have encouraged us to accelerate our service delivery capabilities in Asia Pacific”, says Jim Olding, Executive Vice President. “We have been managing strategic accounts from the United States in the region since 1998, and the time has come to establish a local presence.” Terix APAC resources include spare parts depots, logistics infrastructure, hardware and software engineers, account management and technical training.

Terix has appointed Darryl Nicke as General Manager for Terix APAC. Mr. Nicke possesses an outstanding IT services background of over thirty years and brings to Terix a depth of experience in executive management, having managed and built service organizations throughout Asia Pacific.

“This appointment is a major step forward, enabling our delivery of world class Service Support to our regional partners. Terix has enhanced its existing global capabilities to address and grow with our partners’ needs,” Mr. Olding says.

Terix provides a comprehensive range of custom and standardized hardware and software maintenance and service options in support of Sun™, SGI™, IBM™, and Hewlett-Packard™ UNIX-based servers, Windows servers, and SAN and NAS storage. Its clients include Fortune 500 companies in industries as diverse as aerospace, telecom, banking and finance. Terix is a privately held company whose web address is www.terix.com.
