TERiX ANNOUNCES DEDICATED GSA PROGRAM

Sunnyvale, CA—September 5, 2006—TERiX Computer Service today announced that it has established a dedicated program devoted to enhancing its support of Federal, State and Local government customers and prospects. TERiX has submitted and awaits approval on a Federal GSA Schedule 70 for hardware and software maintenance support (SIN 132-32 and SIN 132-34).

“TERiX provides hardware and operating system maintenance services annually to several large federal agencies. Our growth in recent years, which has been escalated by our new products and services offerings, has positioned us to become more focused on the public sector marketplace,” said Larry Quinn, TERiX Director of Sales.

“For over nine years, TERiX has provided mission critical maintenance and support to government and commercial customers. Our submitting qualifications for our GSA Schedule 70 is just one of many commitments we will make in special focus to federal, state and local agencies,” Quinn added. TERiX offers critical support 7 days a week, 24 hours a day, 365 days a year onsite with special service level agreements for customers with mission critical technology support needs. TERiX Channel Partners that have Federal GSA Schedules will also now have options to add TERiX maintenance support pricing to their Schedules for offer to their clients through modification submissions.

TERiX provides a comprehensive range of custom and standardized hardware and software maintenance and service options in support of Sun, IBM, HP, and SGI Unix-based servers, Windows servers and SAN and NAS storage systems. TERiX serves over 850 customers in the United States and abroad and its clients include Fortune 500 companies in industries as diverse as aerospace, telecom, banking, government, technology, manufacturing and finance. TERiX is a privately held small business whose web address is www.terix.com.
