

## **TERiX Awarded Global Communications Giant Network Services Contract**

Sunnyvale, CA – December 12, 2016

TERiX Computer Service was awarded a multi-year network service and support contract from a global communications, hosting and intent service provider. Under the terms of the confidential agreement, TERiX will offer support for network, server and storage products under a three (3) year period, providing parts delivery, 7x24x365 backline engineering access, and onsite labor for trouble issue resolution.

“This new customer award, following several in the past few months, further validates TERiX as a ‘go-to source’ for world class data center maintenance services on a global scale”, stated James Olding, TERiX COO. In August of this year, TERiX was awarded a US & Canada Deployment Project for a large Retail customer by a Large Systems Integrator (SI), which followed a March award for “by-the-call” services from another Integrator. This new award will see TERiX delivering support on Cisco network products, as well as on various server and storage devices internationally.

TERiX is known for its data center services for server, storage and network product coverage based on its 7x24x365 support structure in the US & 48 countries. “This win, the third large contract award in 2016, shows the market appreciates our honed skill set and competencies to meet customer data center service needs”, Olding added.

As enterprise level customers and their partners look for competent professional service delivery capabilities at the push of a button, whether traditional data center maintenance, or deployment projects, TERiX is positioned to help them succeed.
