

## TERiX Passes 1800+ Site Milestone in Retail Deployment Project

Sunnyvale, CA – December 5, 2017

TERiX Computer Service passes a major milestone in a deployment project by delivering more than 1,800 sites successfully. TERiX was awarded a contract from a large Systems Integrator (SI) for delivery of Deployment services for a large Retail Industry client in June of 2016.

“The original program called for hardware installation, site surveys and wiring services to be delivered across 1,000 sites. We are pleased that our systems integrator and their client chose to expand the project based on the results we were achieving for them”, stated Mike Halverson, TERiX VP of Sales.

TERiX is known for its world-wide data center hardware support services, providing expert server-storage-network support in the US & 48 countries. In support of this competency, TERiX was named as a “Pure Play” Third Party Support Maintainer in Gartner Group recent August 2017 report by Christine Tenneson as a Market Guide for Data Center Maintenance.

Many analysts following the Retail Industry have been predicting increases in Retail Deployments as outlined in articles like the analysis in CIO from IDG in January 2017: <https://www.cio.com/article/3155507/retail/8-retail-technology-predictions-for-2017.html>.

As enterprise level customers and their partners look for expert professional service delivery capabilities at the push of a button, TERiX is positioned to help them succeed. TERiX offers traditional data center service globally, but in the recent annual period has also added several large name deployment projects to its customer successes.
